

AIA's award of Certificate of Excellence from JIG

On 30 December and following the recent inspections by the Joint Inspection Group (JIG) to the Athens Airport aviation fuel supply chain, all parts of it (i.e. the HELPE refineries, the AAFPC pipeline company, the OFC hydrant refueling system and SAFCO the into-plane company) have been awarded with. It is the first time worldwide that all parties comprising the fuel supply chain of an airport achieve such a recognition of excellence, all in the same year.

JIG is the international forum formed by oil companies which standards have effectively become the global benchmark. As a result, the JIG standards are currently applied at about 180 of the world's major airports and some 2500 locations around the world.
