During November 2021 the airport’s passenger traffic amounted to 1.22 million and, although it overall signified the progressive recovery observed since June, it continued to be substantially affected by the COVID-19 pandemic crisis and its impact on air travel, being below the respective November 2019 levels by 26.9%. In the domestic market, traffic was below the respective 2019 levels by 15.8%, while in the international sector, passenger demand presented a 31.6% decline vs the corresponding 2019 traffic.

During the period January through November 2021, the airport’s passenger traffic totalled 11.24 million approximately, exceeding the respective 2020 levels by 43.3%, but lagging behind compared to 2019 by 53%. Domestic passengers exceeded the 2020 levels by 43.7% and international passengers by 43.1% but lagged well behind 2019 levels by 42.3% and 57.7% respectively.

**Notes**

As of January 2021, comparison to the respective month of 2020 and 2019 (passengers’ and flights’ figures) is presented. It is reminded that the pandemic’s impact was initially recorded mid-March 2020 onwards.

November 2021 traffic statistics are provisional and subject to change; traffic data for the previous month are finalised following the 20th of each month
