During March, the airport’s passengers produced a strong rise of 10.4%, reaching 1.52 million. Although domestic travellers presented a decline (of -4.4%), mainly due to the reduction of the offered capacity in the domestic flights, international passengers demonstrated a sharp rise of 18.9%, which constituted the base for the overall outcome.

Overall, during the first three months of 2018, the airport’s passenger traffic reached 4 million, exceeding prior-year levels by a robust 8%, with domestic traffic being below the respective 2017 volumes (-5.5%), whereas international passengers enjoyed a sharp increase of 15.9%.

March 2018 traffic statistics are provisional and subject to change; traffic data for the previous month are finalised following the 20th of each month.
