April was the month that the COVID-19 pandemic crisis as well as its impact on air travel peaked in Europe and America, with minimal airline operations. As a result, the airport’s passenger traffic bottomed, being 98.9% below the respective 2019 levels and amounting to only 22 thousand approximately. Both domestic and international passenger traffic were sharply reduced, by 97.9% and 99.3%, respectively.

Overall, during the first four months of 2020, the airport’s passenger traffic totaled 3.5 million, presenting a decline of -45% compared to prior-year’s levels, severely impacted by the sharp traffic drop suffered during March and April, due to the pandemic. Analytically, international passengers decreased by 44.7% and domestic passengers by 45.7%.

April 2020 traffic statistics are provisional and subject to change; traffic data for the previous month are finalised following the 20th of each month
